

**ABSTRACT**

The present invention relates to a system for providing location information using a mobile communication network, and more particularly, to a system for providing emergency relief location information using a mobile communication network, by which location and situation information of a mobile communication subscriber can be easily known through the mobile communication network using the mobile communication terminal. An object of the present invention is to provide a system for providing emergency relief location information using a mobile communication network, capable of notifying location and situation information of a given mobile communication subscriber who is placed in an emergency situation through a mobile communication terminal of a given relief personnel adjacent to the place where the emergency situation has occurred. Another object of the present invention is to provide a system for providing emergency relief location information using a mobile communication network, which can prevent in advance illegal deposit withdrawal by stopping a transaction of financial accounts owned by a given mobile communication subscriber in case of emergency. Still another object of the present invention is to provide a system for providing location information using a mobile communication network, which can provide location information that allows the location among the mobile communication subscribers to be easily found through the satellite communications and the mobile communication network.
